All cleanings include a complimentary subsea inspection of your ship, conducted by a certified inspection diver.

We can immediately highlight any areas of concern and provide on-the-spot solutions for our customers, bringing a higher level of service over our competitors.

Our underwater cleaning team are highly adaptable and can be deployed in adverse conditions, including limited visibility, sea currents and during vessel cargo operations without compromising results.

Hull Cleaning Services

Our Equipment

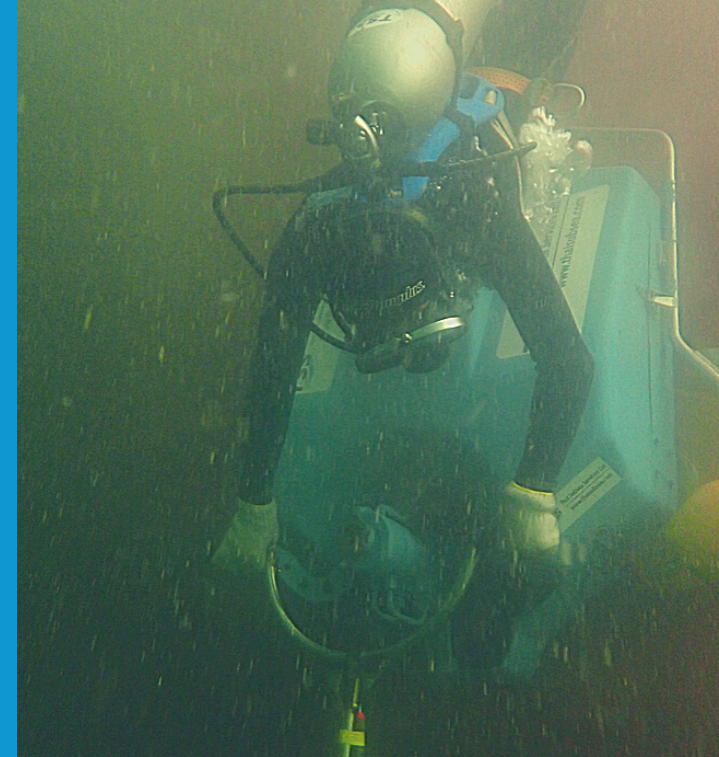

Every ship cleaned by TSS uses original Piccard® Brush Kart cleaning equipment and products.

Piccard® is a brand that stands out from the rest and has set the world-wide standard for subsea cleaning products.

Notorious for its performance and versatility, immaculate results are obtained every time, minimizing vessel down time and maximizing fuel efficiency.

Its patented hull cleaning brushes can be readily changed to suit any type of marine bio-fouling that may be encountered. From light grasses and weeds, to heavy growth of such as barnacles and tube worms.

The unit is self-contained, eco-friendly and can be quickly mobilized to any port at a moment's notice. Our team is on standby 24/7.

By utilizing the very best operators in the country, our company is committed to “Protect Your Coating,” ensuring no damage to paint coating occurs during operations.

Our “Multi-Layered Polishing Process” ensures your prop shines like new. TSS always strives to achieve a Rupert grade “A” smoothness rating.
